## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Rippel (U. S. Patent No. 5, 041,780).

Referring to claims 1-2, Rippel discloses a semiconductor current detector (in Figure 8) of improved noise immunity for detecting or measuring an electric current, comprising:

a semiconductor substrate (10) having a Hall-effect device (sensor 1, sensor 2) formed therein from one surface thereof, the Hall-effect device having a plurality of semiconductor regions including a primary working region (any region of the Hall sensor) for generating a Hall voltage proportional to the magnitude of a current to be detected or measured (column 1 line 47-column 2 line 2);

insulating means (12) formed on said one surface of the semiconductor substrate (10);

a shielding layer (13) formed on the insulating means for shielding the Hall-effect device from external disturbances; and

a conductor strip (shaped conductor in Figure 8) disposed on the shielding layer so as to extend around at least about three quarters of the primary working region(if

defining three quarters of the primary working region to be the regions of the hall-effect sensor surrounded by the shaped conductor shown in Figure 8) of the Hall-effect device, for carrying the current to be detected or measured, the conductor strip being insulated (through the insulating layer 14) from the shielding layer.

### ***Response to Arguments***

2. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.

### ***Allowable Subject Matter***

3. Claims 3-7 are allowed.

### ***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2858

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
